

## **SUPERB GROUP OF 64 WW1 MARINE SEEFLEIEGER AND ZEPPELIN PHOTOS**

A group of 64 photos relating to Marine Seeflieger and Luftschiffer. Some superb photos of aircraft and personnel; flight badges, Seeflieger cap tally's, pilots in flight kit etc. Aircraft mainly different models of Friedrichschafen's but also a number of other types and several of crashed Allied types. Various Zeppelins pictured and different types of balloons, a couple of good large shots of Zeppelin cupolas and a couple of airfield antiaircraft guns. Zeppelins appear to be army types

Photos of various sizes but mainly 12cm x 8cm and bigger. Only a few of the photos have names and descriptions on reverse.

A very nice selection of photos. If these photos were in an album with the same number of scenic, family, battlefield, aerial shots etc; 'normal' shots you find in most albums, the album would retail for a great deal more but here you have all the good photos with just a small number of less interesting ones.
